

EEF Meeting Minutes, Thursday January 23, 2020

Erlang Ecosystem Foundation, Minutes of a Regular Meeting of the Board of Directors
Meeting #22, January 23, 2020

A regular meeting of the Erlang Ecosystem Foundation was held over group conference call (Zoom) beginning at 16:00 UTC

Attendance

The following members of the board of directors were present (9/11): Francesco Cesarini, Benoît Chesneau, Maxim Fedorov, Kenneth Lundin, Miriam Pena Villanueva, Frédéric Trottier-Hébert, Sebastian Strollo, José Valim, Alistair Woodman.

In addition to the board of directors, Tristan Sloughter (chairperson for the Building and Packaging, as well as the Observability working groups) and Frank Hunleth (from the Embedded working group) was present.

Agenda Items

1. Vote of the minutes of the previous meeting.

RESOLVED, that the Erlang Ecosystem Foundation approve the minutes as presented as representing a true and accurate record of the board meeting #21 held on January 9, 2020. Unanimously approved

2. Intermediate actions: Alistair received a letter from California Department of Justice which stated that the foundation had not paid renewal fees and had failed to file copies of tax returns for the years 2017 and 2018. Alistair has since responded and explained that we didn't exist in those two years. We have also received acknowledgement from the CA DoJ (on January 15, from Patricia Licea-Chavez, Staff Services Analyst, Registration Compliance Desk) that they had sent the letter in error. No further action needed.
3. Treasury update: Skipped in the interest of time (nothing new to report since last meeting).
4. Spending Requests
 1. Miriam presented the proposal to use \$1000 of the education working group budget to fund "10 free diversity slots for one full-day (8 hours) trainings during

CODE BEAM SF” (full proposal included in the minutes of this meetings). The proposal was seconded by Fred and approved by the meeting. From the discussion it was noted that several board members would like to see a report from the education working group with the results, to learn more about how (and wether) to do this in the future.

RESOLVED, that the Erlang Ecosystem Foundation approve the proposal to allocate \$1000 to offer 10 diversity slots as described in the proposal. The vote count was: 8 for the motion and 1 abstain.

2. Tristan reported that he has been given time off from his employer to do the work on relx 4.0 (for which he had previously requested a stipend). Given that, he no longer needs the funding from the foundation.
3. Frank Hunleth presented a proposal to create a website for the Embedded Erlang working group (and to spend money on an external firm, Very Possible, to implement this site). The general sense of the board was that it should be okay for working groups to have their own sites, Benoit pointed to the model of the Apache foundation. (Note: currently all EEF working groups have their own “standard” page on the erlef.org site). There was some discussion wether the site needed to be “dynamic” vs “static”. It was also noted that the proposal was too economically vague to vote on. Alistair will work with Frank to firm up the proposal.
5. Election update: In an email discussion since last meeting, the board was now more leaning towards the interpretation of section 5.5 of the bylaws that would imply that only a third of the board would be up for re-election this year. Fred will write a formal proposal on how to divide us up in cohorts in accordance with the bylaws and suggest dates for the election. It was noted that if anyone wanted to step down, they should make it known so that we could make them part of the cohort that would be up for re-election.
6. Any Other Business:
 1. Proposal from Benoit and José that they setup an EEF home for Google Summer of Code. They have previously done so under the name “BEAM Community”, and the plan is to transfer the assets from there to the new EEF umbrella. Also to ask the working groups if they have any project proposals. Everyone agreed that this is a good idea.

2. An incoming suggestion from Peer regarding cooperation with recruiters was tabled until Peer can present the idea.
 3. Benoit brought up a concern that the working groups does not have any rules for reporting, and that the foundation as a whole is too opaque (that it is too hard to join the work done in working groups). Part of the problem is that the infrastructure is not in place (being worked on). Benoit will send out a proposal for rules and guidelines for working groups for next meeting.
 4. Miriam informed us that EEF will have a keynote slot at the Code BEAM SF in which the working groups will have a chance to present the work they do.
 5. The non-profit application is in progress (both the IRS and state of California, have acknowledged receipt of our application).
7. Alistair declared the meeting adjourned at 17:01 UTC.

Dated January 23, 2020

Secretary of the meeting: _____ Sebastian Strollo

First Name: Miriam

Last Name: Pena

Bio: Chair of Education WG

Stipend Type: Diversity stipend

Stipend Amount: 1000.00

Payment Method: Wire

Purpose

Supporting underrepresented people in tech and providing education is part of the goals of the foundation and of our working group. As part of our efforts to achieve those goals, the education working group has approved a collaboration with the organization of Code BEAM for funding trainings during the conferences.

The education working group has voted on our Jan/14 meeting and approved a collaboration with the organization of Code BEAM in providing 10 free diversity slots for one full-day (8 hours) trainings during CODE BEAM SF to the community. These slots are targeted for people who are underrepresented groups in tech. The Education WG will spend 1000 of its budget to cover the cost of those trainings (at a cost of 100\$ per training). Code BEAM SF will cover the rest of the cost of these trainings (currently priced at several hundred dollars per person).

How would it work?

The slots will be announced by social media and emails and people interested in attending will have to submit an application through a form indicating:

- A bit of info about themselves, what they do, who they work for, why they want to attend,
- What their previous knowledge is.
- "Let us know why should be rewarded a diversity ticket.
- What training they want to attend. The list of available trainings can be found at <https://codesync.global/conferences/code-beam-sf/#learn>.
- Acceptance of the fact that they will give us in return a brief summary of what their experience was and what they have learned in the training so we can measure how effective this was.

The winners of the 10 slots will be selected between the education working group and Code BEAM SF (Areege & Barbara) based on their applications, trying to choose the person who deserves them the most. By early-mid February, the winners will be announced.

Beneficiaries: This will benefit:

- The people attending the training
- The foundation in general:
 - Supporting underrepresented people is part of our goals.
 - Giving training is part of our goals.
 - Good marketing around this will potentially bring new members and sponsors. :)
- The Education WG as we will have some stats of what training the community is more interested on for our future efforts.

Report: After the trainings are performed we will present stats to the board regarding how many people submitted applications, what trainings were selected, and the feedback from the trainings.
