

EEF Meeting Minutes, Thursday April 16, 2020

Erlang Ecosystem Foundation, Minutes of a Regular Meeting of the Board of Directors Meeting #27, April 16, 2020

A regular meeting of the Erlang Ecosystem Foundation was held over group conference call (Zoom) beginning at 16:00 UTC.

Attendance

The following members of the board of directors were present (10/11): Francesco Cesarini, Benoît Chesneau, Maxim Fedorov, Frédéric Trottier-Hébert, Kenneth Lundin, Miriam Pena Villanueva, Peer Stritzinger, Sebastian Strollo, José Valim, and Alistair Woodman.

Agenda Items

1. Vote of the minutes of the previous meeting.

RESOLVED, that the Erlang Ecosystem Foundation approve the minutes as presented as representing a true and accurate record of the board meeting #26 held on April 2, 2020. Unanimously approved..

2. Intermediate actions: none
3. Treasury update: nothing to report.
4. Board officer election: Alistair declared that he was willing to continue as chairperson, Sebastian was willing to continue as secretary and treasurer. There were no other candidates for the positions. Private was vote requested, Peer and Fred will send out ballot for voting through WildApricot, voting period until next board meeting.
5. Using Zoom for conference calls: Kenneth reported that Ericsson has disallowed use of Zoom on company computers (but he is able to join by other means). Others have the same issue. Peer has analyzed the security issues (like leaking to facebook), seems like Zoom has addressed security concerns. Conclusion: keep using Zoom, but start using meeting password.
6. Plataformatec assets: Alistair asked permission to talk to Hugo about whether there is anything EEF could / should take on. May no longer be a question (as Hugo has

moved on and will probably keep the assets himself). No objections from board to at least reach out to Hugo.

7. Stipend proposal from Devon Estes, for a project to build a mutation testing tool: As has been discussed before, the general opinion of the board is that sponsoring technical projects should go through working groups. That way more than one person can team up and prioritize, vet, and find contributors to such projects. In this particular case there may not be an existing working group that matches, but in that case the answer could be to set up a “testing” working group, or a general “tools” working group and then try to gain momentum for ones project. Or perhaps join an existing working group and break out into a new one if needed. Also, for this particular case, Francesco has reached out to Thomas Arts and John Hughes as they have experience in the mutation testing field. Francesco can introduce Devon to Thomas and John.

RESOLVED, that the Erlang Ecosystem Foundation decline the request for the stipend, but encourage Devon to form a working group around testing or tools.

8. Continuation of discussion from last meeting about how to get more people involved. Francesco suggested that we ask working group chairs to present to sponsors. Several board members were wary about using WG chairs volunteer time to do this, but also that working groups should present to the *community*, not just sponsors. Another comment was that it should be the job of the board and / or sponsorship working group to keep sponsors happy. But in general, we of course want working groups to report to the board. It was also pointed out that some working group members actually contribute to the working group on their “work time”, i.e. their contributions are sponsored by their employers. It was also pointed out that if the working groups had a way of sharing what they are working on in a standardized manner it would be easier to get the process going (see Benoit’s proposal). Having a workshop where WG participants share what they are working on and share ideas, was brought up as an idea of a format.

Conclusions: The target audience for WG presentations on what they are working on should be the community. The sponsorship working group need to start working on how to present accomplishments to the sponsors.

9. No other business

10. Alistair declared the meeting adjourned at 17:03 UTC.

Dated April 16, 2020

Secretary of the meeting: _____ Sebastian Strollo
