

EEF Meeting Minutes, Thursday Sep 3, 2020

Erlang Ecosystem Foundation, Minutes of a Regular Meeting of the Board of Directors Meeting #36, Sep 3, 2020

A regular meeting of the Erlang Ecosystem Foundation was held over group conference call (Zoom). The meeting began at 16:03 UTC.

Attendance

The following members of the board of directors were present (10/11): Francesco Cesarini, Benoît Chesneau, Maxim Fedorov, Frédéric Trottier-Hébert, Kenneth Lundin, Peer Stritzinger, Sebastian Stollo, José Valim, Miriam Pena Villanueva, and Alistair Woodman.

Agenda Items

1. Vote of the minutes of the previous meeting.

RESOLVED, that the Erlang Ecosystem Foundation approve the minutes as presented as representing a true and accurate record of the board meeting #35 held on Aug 20, 2020. Unanimously approved.

2. Intermediate actions: none. Note: Action Item to the sponsorship working group to reach out to our sponsors and ask if they are willing to renew.
3. The financials had not changed since last meeting, Sebastian presented the 2019 numbers in preparation for the financial report at the Annual General Meeting. Peer presented the membership numbers: Annual Supporting members: 96 (unchanged), Lifetime Supporting members: 9 (unchanged), Basic members: 464 (+10 since last meeting).
4. Google Summer of Code update: GSoC is finished, by Friday the final results will be presented.
5. Student sponsorship requests. There were two stipend requests for students to attend the Code BEAM Stockholm (virtual) conference. The requests had been vetted by the education working group, and was presented to the board by Miriam.
 1. From John Hughes at Chalmers for student ticket for up to 30 students (approximately \$500).

RESOLVED, that the Erlang Ecosystem Foundation approve the stipend request from John Hughes and sponsor the student tickets, up to 30 students. Vote count: Francesco abstained, none against, everyone else approve.

2. From Walter Cazzola at Università degli Studi di Milano for student tickets for up to 30 students and for learning activity tickets for up to 10 students (approximately \$1200).

RESOLVED, that the Erlang Ecosystem Foundation approve the stipend request from Walter Cazzola and sponsor the student tickets, up to 30 students, and training activities, up to 10 students. Vote count: Francesco abstained, none against, everyone else approve.

6. Currently the Annual General Meeting and the cohort board election are tied together in time by the bylaws. This year, for various reason (mostly covid related) we ended up doing the election earlier this year, and the AGM now in September. The board discussed how to explain this at the AGM, seems straight forward and not so much of an issue, given the circumstances. The board further discussed whether it should propose a change in the bylaws that would clearly separate the two events (i.e. not requiring them to coincide). In general the board favored this idea.
7. Alistair presented the time slots for the Annual General Meeting, two times (to cater for most timezones around the globe): September 11 at 11am CET (suitable for EMEA and APAC) and September 11 at 10pm CET (suitable for Americas and EMEA).
8. Francesco presented what the Fellows Working Group is working on, and a proposal for a new charter for the WG. Still work in progress, and no vote was held.
9. Any other business: none
10. Alistair declared the meeting adjourned at 17:12 UTC.

Dated Sep 3, 2020

Secretary of the meeting: _____ Sebastian Strollo

Bio :

John Hughes has been a functional programming enthusiast for more than thirty years, at the Universities of Oxford, Glasgow, and since 1992 Chalmers University in Gothenburg, Sweden. He served on the Haskell design committee, co-chairing the committee for Haskell 98, and is the author of more than 100 papers, including "Why Functional Programming Matters", one of the classics of the area. With Koen Claessen, he created QuickCheck, the most popular testing tool among Haskell programmers, and in 2006 he founded Quviq to commercialise the technology using Erlang.

Stipend Type : conference

Code of Conduct link : <https://codesync.global/about-us/#Conduct>

Stipend Amount : 593

Payment Method : Wire

Purpose

The goal is to enable Chalmers/GU students with an interest in functional programming and the Erlang Ecosystem to attend Code BEAM Virtual on September 10-11th. In most cases this will be Masters students (graduating next summer) who have taken our Parallel Functional Programming course, which includes Erlang as an important practical component, lectures and practicals on MapReduce, lectures on Riak, and guest lectures on the BEAM and on building distributed applications with Erlang. This (and other) FP courses at Chalmers always attract a group of enthusiasts, and these enthusiasts would benefit greatly both from the great programme of talks at Code BEAM Virtual, and from the opportunity to network with potential future employers. Code BEAM Virtual is offering registration for up to 30 students for €500, and it is this that I seek to cover with the stipend. (10 students have signed up since yesterday, so I expect at least that many to take advantage of the opportunity--but there could well be rather more by the time of the conference). I have converted this sum to USD and suggested wire payment, although most convenient would be if the stipend were paid directly to the conference, rather than via my account.

Beneficiaries : Chalmers/GU students with an expressed interest in functional programming and Erlang.

Report : I will report on the numbers of students taking part, and solicit their feedback.

Bio :

Walter Cazzola is currently an Associate Professor in the Department of Computer Science of the Università degli Studi di Milano, Italy and the Chair of the ADAPT laboratory. Dr. Cazzola is the designer of the mChARM framework, of the @Java, [a]C#, Blueprint programming languages and he is currently involved in the designing and development of the Neverlang language workbench. He is also the designer of the JavAdaptor dynamic software updating framework and of its front-end FiGA. He has written over 100 scientific papers. His research interests include (but are not limited to) software maintenance, evolution and comprehension, programming methodologies and languages. He served on the program committees or editorial boards of the most important conferences and journals about his research topics. He is associate editor for the Journal of Computer Languages published by Elsevier. More information about Dr. Cazzola and all his publications are available from his web page at <http://cazzola.di.unimi.it> and he can be contacted at cazzola@di.unimi.it for any question

Stipend Type : Other

Code of Conduct link :

Stipend Amount : 1200.00

Payment Method : Paypal

Purpose

I would like to have some of my current students exposed to the real world Erlang and put them in touch with companies working with/in the Erlang ecosystem and with the research community around the language. To attend the CodeBeam conference, now that it is virtual, seems to be the perfect opportunity for achieving this goal.

Beneficiaries : I'm already in touch with Mr. Francesco Cesarini of Erlang Solutions that suggested me to ask the Erlang Ecosystem Foundation for a stipend for having up to 30 students attending the conference and up to 10 of them attending the learning activities. In this case, the needed stipend would be of 1000 € (500 € for the conference tickets and 500 € for the learning activity tickets).

Report : The students that will benefit from the stipend will write a short report each. I will collect them in a single document that I will send you

To Whom that can concern

Milan, August 26, 2020

Stipend Request.

Dear Colleagues,

This is Prof. Walter Cazzola from the Computer Science Department of the Università degli Studi di Milano in Italy. I have been teaching Erlang to my students since 2010, and through student sponsorship at the Code BEAM Italy events, several of them are now working in the Erlang ecosystem.

I would like to have some of my current students exposed to the real world Erlang and put them in touch with companies working with/in the Erlang ecosystem and with the research community around the language. To attend the CodeBeam conference, now that it is virtual, seems to be the perfect opportunity for achieving this goal.

I'm already in touch with Mr. Francesco Cesarini of Erlang Solutions that suggested me to ask the Erlang Ecosystem Foundation for a stipend for having up to 30 students attending the conference and up to 10 of them attending the learning activities. In this case, the needed stipend would be of 1000 € (500 € for the conference tickets and 500 € for the learning activity tickets).

Erlang Solutions already agreed to pay the difference with respect to what your stipend will cover.

In the hope my request for a stipend could be accepted I thank you in advance for any help.

Best Regards,

(Associate Professor)
