

EEF Meeting Minutes, Thursday April 1, 2021

Erlang Ecosystem Foundation, Minutes of a Regular Meeting of the Board of Directors
Meeting #46, April 1, 2021

A regular meeting of the Erlang Ecosystem Foundation was held over group conference call (Zoom). The meeting began at 16:05 UTC.

Attendance

The following members of the board of directors were present (11/11): Richard Carlsson, Francesco Cesarini, Benoît Chesneau, Maxim Fedorov, Frédéric Trottier-Hébert, Kenneth Lundin, Peer Stritzinger, Sebastian Strollo, José Valim, Miriam Pena Villanueva, and Alistair Woodman.

The following newly elected members of the board of directors were also present (2/2): Sophie DeBenedetto and Bryan Paxton.

Agenda Items

1. Vote of the minutes of the previous meeting.

RESOLVED, that the Erlang Ecosystem Foundation approve the minutes as presented as representing a true and accurate record of the board meeting #45 held on March 18, 2021. Unanimously approved.

2. Intermediate actions:

1. Alistair filed the Annual Registration Renewal (Form RRF-1) with the California Department of Justice (annual filing required by all corporations / associations registered in CA)

3. No financial update (no significant changes since last meeting). Membership update: Annual Supporting members: 125 (+2), Lifetime Supporting members: 12 (unchanged), Basic members: 618 (+10)

4. Fred presented the results of the board election: A total of 97 voters (up from 68 in 2020, translates to a 61% turnout). Results as follows:

Miriam Pena	82
Peer Stritzinger	50
Sophie DeBenedetto	49

Bryan Paxton	47
Maxim Fedorov	39
Benoît Chesneau	29
Erik Stenman	25
Amos King	24
Mahesh Paolini-Subramanya	18

Which means that Miriam, Peer, Sophie and Bryan will now be our new cohort B. Maxim moves to Cohort A in replacement of José Valim and will be up for reelection next year (along with Kenneth and Richard).

Lessons learned from the elections, and changes to implement for future elections:

1. We should make sure to close admin access to the voting system (i.e. Wild Apricot) for those board members who are up for re-election.
2. Candidates should be presented in a fixed order (alphabetical makes sense) on the ballot and on the presentation page.
5. Propose that the current board certify the election outcome.

RESOLVED, that the Erlang Ecosystem Foundation certify the result of the election, that it has been carried out according to the bylaws, and reconstitute the board as described in section 4. Unanimously approved.

6. The new board wishes to thank outgoing board member Benoît Chesneau for his contributions in founding the EEF, his excellent support of transparency to our members, for leading the Google Summer of Code initiative, and his work in the Infrastructure Working Group, among other things. We look forward to keep working with Benoît in the foundation and in the Infrastructure Working Group.

The new board also wish to thank outgoing board member José Valim for his contributions in founding the EEF, all the work done to unite the Elixir and Erlang communities, among so many other things. We look forward to see what will come out of the new Machine Learning Working Group (and all the other activities that José is part of)

7. The board wish a warm welcome to new board members Sophie DeBenedetto and Bryan Paxton

8. Peer presented the Ryu proposal part 2 (see attachment) for a total of USD5000 (about a month of work to implement).

*RESOLVED, that the Erlang Ecosystem Foundation approve the request for \$5000 to implement the Ryu algorithm in C as described in the application.
Unanimously Approved.*

9. Update from Bryan: last invoice submitted. IG WG actively looking for a replacement candidate (suggestions welcome!). Last date mid-late April (when he starts a new position).
10. Sponsorship update: about half of the current sponsors scheduled called. Francesco, Peer, and Sebastian have reached out and brought a number of sponsors aboard.
11. Any other business:
 1. Sebastian offered up the title of “secretary” to anyone interested. Happy to continue the current setup (which is kind of shared with Alistair)
 2. Francesco asked how to interface with the Nayra team? Join the marketing working group meeting on Wednesday and the #marcom and #marketing channels on slack.
12. Alistair declared the meeting adjourned at 17:04 UTC.

Dated April 1, 2021

Secretary of the meeting: _____ Sebastian Strollo

Attachments: Stipend Proposal (1 page)

Stipend Proposal**Stipend Type** : Development Work**First name** : Thomas**Last Name** : Depierre**Nick Name** : DianaO**Email Address** : depierre.thomas@gmail.com**Phone Number** :**Organization Name** :**City** : Lons Le Saunier**Region** :**Postal Code** : 39000**Country** : France**Twitter** : Di4naO**Linkedin** :**Website** : <https://www.softwaremaxims.com/>**Intended product of project** :

An extension to the float_to_* BIFs using the Ryu algorithm, probably named `:shortest`

Purpose

The goal is to speed up even more the float to string operation on the BEAM by dropping it into C, as the original algorithm implementation does. I also hope that by doing so, we will make the code easier to keep aligned with bug fix from upstream

Development Plan

Me, Thomas Depierre. The project is already approved as wanted and interesting by the OTP team, see <https://github.com/erlang/otp/issues/4492> The goal is to pull the core of the algorithm from <https://github.com/ulfjack/ryu>, integrate it into the BIF as a new switch on case and to add a print routine that will follow the rules used by the current pretty printer. In these order and these steps, as the rules for printing are known but not implemented in C so far.

Dissemination : I will definitely do my own blogpost and it will appear in the OTP changelog. Hopefully this will be interesting enough to get a few conference talks

Delivery Method : A PR to OTP that would be merged.

Stipend Amount (USD) : 5000

Payment Method : Wire
