

EEF Meeting Minutes, Thursday October 14, 2021

Erlang Ecosystem Foundation, Minutes of a Regular Meeting of the Board of Directors
Meeting #56, October 14, 2021

A regular meeting of the Erlang Ecosystem Foundation was held over group conference call (Zoom). The meeting began at 16:03 UTC.

Attendance

The following members of the board of directors were present (8/11): Maxim Fedorov, Kenneth Lundin, Peer Stritzinger (joined :09), Sebastian Strollo, Frédéric Trottier-Hébert (left at :28), Bryan Paxton, Miriam Pena Villanueva (left at :31), and Alistair Woodman.

The following members of the board of directors were absent: Sophie DeBenedetto, Richard Carlsson, Francesco Cesarini.

Agenda Items

Agenda slightly rearranged, because Fred and Miriam needed to leave at half past the hour.

1. Report from working groups. Fred presented the working group reports (for details see the working group reports themselves). Reports have come in from: Build and Packaging, Education (the most active group), Embedded (also very active, lots of sponsored projects), Infrastructure (lots of maintenance work), Machine Learning (high visibility in the Elixir community), Marketing, Observability, Sponsorship. Missing reports from: Fellowship (working group “on hold”), Security, Language InterOp, External Process Communication.

Some discussion following the reports around what to do about inactive groups

2. Vote of the minutes of the previous meeting.

RESOLVED, that the Erlang Ecosystem Foundation approve the minutes as presented as representing a true and accurate record of the board meeting #55 held on September 30, 2021. Unanimously approved.

3. Intermediate actions:

1. The application for a stipend of USD \$2800 to support the development work to “to improve the UI and UX of documentation projects generated by ExDoc” was

approved since last meeting by unanimous offline consent via email, on October 5, 2021.

4. Short finance and membership report: we have \$184k in the bank, currently steady rate. Membership numbers are stagnant at the moment. Peer would like to improve the process of claiming "managing and contributing" status (perhaps by including contributing members in the quarterly report).
5. Unanimous consent votes: none
6. Bryan presented the jobs board proposal: funds to be used to pay a developer to implement (Bryan to chaperone). requested funds of \$10,000 is a "budget / not to exceed". Would like more input from others about requirements and rules. Maxim: making it easy to post (e.g. using a template) will lead to more posts. Kenneth: can we include a link to our job-post on the official Ericsson site (seemed like that was the intention). Kenneth suggested also include people looking for jobs (maybe only for paying members?) Alistair proposed we approve the budget of not to exceed \$10,000. Maxim second, no abstentions (Miriam gave her yes before leaving).

RESOLVED, that the Erlang Ecosystem Foundation approve the budget of \$10,000 for the jobs board project. Unanimously approved (with 7 votes).

7. Alistair declared the meeting adjourned at 16:59 UTC.

Dated October 14, 2021

Secretary of the meeting: _____ Sebastian Strollo

Attachments:

1. Stipend proposal from José Valim

Stipend Proposal

Stipend Type : Development Work

First name : José

Last Name : Valim

Nick Name : josevalim

Email Address : jose.valim@dashbit.co

Organization Name : Dashbit

City : Tenczynek

Postal Code : 32-067

Country : Poland

Intended product of project :

We would like to request funding to improve the UI and UX of documentation projects generated by ExDoc. In particular, we want to redesign the sidebar of the HTML pages to be make it clearer to use and navigate.

Purpose

Given the adoption of EEP 48, ExDoc can now be used to generate documentation for both Elixir and Erlang projects. Hooking other BEAM languages should be relatively straightforward too. Here are some examples: * ExDoc for Elixir: <https://hexdocs.pm/elixir> * ExDoc for an Erlang project: <https://hexdocs.pm/telemetry> * ExDoc for OTP: http://wojtekmach.pl/otp_docs/stdlib/array.html The whole community will benefit from improved navigation.

Development Plan

We need two people involved: a designer and a JavaScript+Elixir programmer. At Dashbit, there is a designer we are very happy to work with (he designed Livebook for us) and we do have JavaScript+Elixir expertise. Overall, we estimate 10 days of work altogether is enough to get this done. Given more than one person is involved, I am doing the stipend request in the name of Dashbit, and we will use our team plus the designer (as a Dashbit contractor) to deliver it. PS: I have submit this proposal in the past, and it was accepted, but the person who was responsible to develop it became unavailable.

Dissemination : I will gladly make some noise on Elixir's new releases and on social media about the new sidebar once it is released.

Delivery Method : The result will be a new ExDoc version published to Hex. I will submit an invoice once the work is completed and released. This work will happen under the Build and Packaging WG.

Stipend Amount (USD) : 2800

Payment Method : Wire
