

EEF Meeting Minutes, Thursday Sep 1, 2022

Erlang Ecosystem Foundation, Minutes of a Regular Meeting of the Board of Directors
Meeting #69, September 1, 2022

A regular meeting of the Erlang Ecosystem Foundation was held over group conference call (Zoom). The meeting began at 16:07 UTC.

Attendance

The following members of the board of directors were present (10/11): Sophie DeBenedetto, Francesco Cesarini, Maxim Fedorov, Kenneth Lundin, Ben Marx, Bryan Paxton (joined at :40), Miriam Pena Villanueva, Peer Stritzinger, Sebastian Strollo, and Alistair Woodman.

The following members of the board of directors were absent: Frédéric Trottier-Hébert

Agenda Items

1. Approval of minutes from previous meetings. Correction to meeting #68: Kenneth Lundin was not present, i.e. 9 out 11 board members were present.

RESOLVED, that the Erlang Ecosystem Foundation approve the minutes as presented as representing a true and accurate record of the board meeting #67 held on June 9, 2022. Unanimously approved.

RESOLVED, that the Erlang Ecosystem Foundation approve the minutes as presented as representing a true and accurate record of the board meeting #68 held on June 23, 2022 - with the correction that Kenneth Lundin was not present. Unanimously approved.

2. Intermediate actions: none to report
3. Financial update: Sebastian presented balance sheet, “profit and loss”, project spending, and income for the year to date - no questions. Membership update: 142 annual supporting (+2), 1025 basic (+38), 18 lifetime (+1), 15 managing and contributing (unchanged).
4. Unanimous consent votes: none scheduled

5. Proposal to sponsor Spawnfest at platinum (\$3000) level.

RESOLVED, that the Erlang Ecosystem Foundation approve the sponsorship of SpawnFest 2022 at \$3000. Vote count: 8 for, Miriam abstained (Bryan had not yet joined the meeting).

6. Travel stipend request from Adolfo Neto, \$800 to cover travel expenses to be able to present in person at Code BEAM America 2022.

RESOLVED, that the Erlang Ecosystem Foundation approve the travel stipend request from Adolfo Neto at \$800. Vote count: 7 for, Francesco and Sophie abstained (Bryan had not yet joined the meeting).

7. Any other business:

1. Brief discussion regarding hiring an admin. Concluded that we need a job description to start with. Alistair to start and share a document for this purpose.
2. Annual General Meeting 2022: we need to have an AGM, Alistair will start putting together material and ideas on how and when.

8. Alistair declared the meeting adjourned at 16:53 UTC.

Dated September 1, 2022

Secretary of the meeting: _____ Sebastian Strollo

SpawnFest sponsorship information 3 pages

Stipend Type : Other

First name : Adolfo

Last Name : Neto

Email Address : adolfo.utfpr@gmail.com

Organization Name : UTFPR (Federal University of Technology - Paraná)

Organization Email : ppgca-ct@utfpr.edu.br

City : Curitiba

Country : Brazil

Twitter : @adolfont

Linkedin : <https://www.linkedin.com/in/adolfont/>

Website : <https://adolfont.github.io/>

Bio : Associate Professor at the Federal University of Technology, Paraná. Co-creator and co-host of the Fronteiras da Engenharia de Software podcast, Elixir em Foco podcast and Emílias Podcast - Women in Computing, all of them in Portuguese. Member of the Education, Training, & Adoption Working Group of the Erlang Ecosystem Foundation.

Purpose: A talk proposal (see attachment) from my student Lucas Tavano and me was accepted for presentation at Code BEAM America 2022. The original idea was to present this talk online because traveling to the USA from Brazil right now is very expensive. Our currency is at a very low point when compared to US dollars. My university has not enough funding to cover all my costs. The Code BEAM organization told us they could cover our airplane tickets. If the Erlang Ecosystem Foundation covers hotel costs (four nights), it would be an excellent opportunity to meet other peers from the EEF in person besides giving the talk.

Report : - One video about the event for each of my YouTube channels (one in Portuguese and one in English) - A brief comment (approximately 2 minutes) in the next episode of the Elixir em Foco podcast. - A blog post in Portuguese about the event and my participation. - A blog post in English about the event and my participation.

Beneficiaries : I would be the beneficiary of the stipend. I will share the knowledge acquired at my university, the Elixir em Foco podcast, my YouTube channels and my social network accounts, stating that I was partially supported by the EEF.

Comparing Elixir and Python when working with Simple Neural Networks

 [Edit session \(/app/speaker/session/365154\)](/app/speaker/session/365154)

Description

With a wide range of libraries focused on the machine learning market, such as TensorFlow, NumPy, Pandas, Keras, and others, Python has made a name for itself as one of the main programming languages. In February 2021, José Valim and Sean Moriarity published the first version of Numerical Elixir (Nx), a library for tensor operations written in Elixir. Nx aims to allow the language to be a good choice for GPU-intensive operations.

This talk aims to compare Python and Elixir when training convolutional neural networks using MNIST and CIFAR-10 datasets as examples, analyzing development experience, and performance difference.

Session format	I can do both, 40 & 25-minutes
Track	Innovation
Talk objective(s)	- Teach about the new Nx library for Elixir - Compare Nx and Keras by the use of resources and time to train similar neural networks - Talk about the experience of developing in both languages and how different this experience was.
Target audience	- Numerical Elixir (Nx) interested people - Python AI developers - Data scientists
Level	Introductory and overview
Which three words would best sum up your talk?	Nx, Performance, Comparison

Question would you like to be
ask during the Q&A

Which was your biggest challenge during this project?

Adolfo Neto

CREATOR AND CO-HOST OF ELIXIR EM FOCO PODCAST

Adolfo Neto is an Associate Professor at the Federal University of Technology, Paraná since 2008. He is also the creator and co-host of the Elixir em Foco podcast, a podcast about Elixir and the BEAM in Portuguese.

✉ adolfo.utfpr@gmail.com (mailto:adolfo.utfpr@gmail.com)

Which organisation are you affiliated with?	Federal University of Tecnology - Paraná
Job title	Associate Professor
Contact number	+55 41 996812061
Which city are you based in?	Curitiba
Which country are you based in?	Brazil
Have you spoken in public before?	Yes, including once at Code BEAM Europe 2022.
How do you plan to give your talk?	virtually
Would you be interested in delivering a training?	Yes
Interested in doing an interview/blog post?	Yes

Lucas C. Tavano

SESSION OWNER

Elixir Software Engineer

I'm Brazilian, living in Curitiba, PR. Started my interest in development since I was just a child, playing with Arduino and Raspberry Pi.

Started studying Computer Engineering at (Universidade Tecnológica Federal do Paraná) in 2015 and since then never left this path till today.

I've been hired as a software engineer for the first time in 2017, starting my career in embedded systems with Python and Shell, then moving to PHP and Elixir as a back-end developer for 3 years, and at last, I've fully focused my career on being an Elixir back-end developer for the last year.

SpawnFest 2022 sponsorship proposal

What?

SpawnFest is an annual 48 hour online software development contest in which teams from around the world get exactly one weekend to create the best BEAM-based applications they can. The ideals behind SpawnFest are fun, learning, networking, and helping to connect sponsors and players for jobs. In addition, long term projects can fall out of this, which is excellent for the ecosystem. An example of one such project is `erlang_ls`, The Erlang Language Server.

The intention behind this proposal is to gain sponsorship by the EEF for SpawnFest as a platinum sponsor.

Platinum sponsorship in the form of 3000 USD worth of Amazon gift card(s). At least 1500 is up for grabs by winning players. It is up to designated team drivers how to divide this up within a team and not the Foundation's burden. Furthermore, it is up to the competition organizers to divide the prize between teams (and then teams within themselves) and also not the Foundation's burden.

SpawnFest would add EEF logo(s) to the site and market EEFs sponsorship through various social channels.

Who?

SpawnFest is being driven this year by the following organizers.

- Pablo Costas Sánchez
 - NextRoll
 - Education WG member
 - Annual EEF supporting member
 - Ran SpawnFest 2021

- Paulo F. Oliveira
 - Dazzle Rocks
 - Active contributor to EEF software projects
 - Annual EEF supporting member
 - Ran SpawnFest 2021
- Filipe Varjão
 - 2600hz
 - Ran SpawnFest 2021

Why?

From all my experiences within the BEAM community, everyone looks forward to SpawnFest, as players or onlookers. Last year was the biggest turn out ever in the history of the event and the organizers are aiming for an even bigger turn out this year. In order to achieve a bigger turn out we believe more sponsors and more prizes is the way to go.

EEF being a platinum sponsor, and perhaps what will be the biggest sponsor is no small thing. SpawnFest would indeed make a lot of noise about this; as can the EEF itself.

It's in line with EEF goals. Namely, connect companies with engineers, especially less experienced and / or newer engineers. Further, a job fair for sponsors and players prior to the event is on the organizer's agenda. Said job fair is a Toucan event a few days before the competition. Last year this was hands down a huge success and further drove up our membership numbers.

How?

Head on over to <https://spawnfest.org/> go to the sponsors section and click the form link or just go here: <http://sponsor.spawnfest.com>

When?

The event will be held Oct 15th and 16th (approximately 2.5 months from now). This gives the organizers plenty of time to come up with new ideas on how to promote the event and its sponsors. Further, how to get more players and project ideas to come to fruition. Specifically, we want to see projects that sustain or at least can be picked up by others after the event.

Where?

The event is held online and globally available.
