

EEF Meeting Minutes, Thursday March 2, 2023

Erlang Ecosystem Foundation, Minutes of a Regular Meeting of the Board of Directors Meeting #77, March 2, 2023

A regular meeting of the Erlang Ecosystem Foundation was held over group conference call (Zoom). The meeting began at 16:02 UTC.

Attendance

The following members of the board of directors were present (9/11): Francesco Cesarini, Ben Marx, Frédéric Trottier-Hébert, Bryan Paxton, Kenneth Lundin, Miriam Pena Villanueva, Peer Stritzinger, Sebastian Strollo, and Alistair Woodman.

The following members of the board of directors were absent: Sophie DeBenedetto, Maxim Fedorov

Agenda Items

1. Approval of minutes from previous meetings.

RESOLVED, that the Erlang Ecosystem Foundation approve the minutes as presented as representing a true and accurate record of the board meeting #75 held on February 2, 2022 as well as board meeting #76 held on February 16. Unanimously approved

2. Intermediate actions and activities:

1. Alistair received offer to renew board insurance, he will do so.

3. Treasury and membership update: Sebastian presented the current balance statement, p&l for year to date, the status of project payouts, and sponsorships. Peer presented membership numbers: Annual Supporting: 145 (+2), Basic 1160 (+27), Lifetime 18, Managing and Contributing: 14, for a total of 1346 (+29).

4. Unanimous consent votes: none scheduled

5. Upcoming Board election. Bryan and Ben reported: initial blog post went out, board members that are running for re-election have been pinged. So far no one has been in touch to run for a board seat, and not many views of the blog post. Reminders will be sent out. Note to existing candidates: do get your profile in, once profiles are up on the site it encourages others to run for a seat.

6. Stipend requests:

1. Tutorial for writing secure Elixir, Michael Lubas, \$2000. Peer sherpa. The proposal is for a tutorial around Phoenix and Elixir and how to avoid common security pitfalls.

RESOLVED, that the Erlang Ecosystem Foundation approve the stipend request from Michael Lubas for \$2000 to write a tutorial on how to write secure Elixir. Unanimously approved.

7. Paid assistant role: Francesco looked into the cost for an assistant based in for example Argentina, 1k - 1.5k / month for part-time (50%). Discussion around what tasks would be appropriate. Everyone: please add more items to the document, reach out to working groups that you are in for more ideas. Item will be kept on agenda.
8. Budget planning 2023. No changes since last meeting, everyone agrees it is a useful tool to discuss where we think the priorities for EEF should be.

9. Any other business:

1. Francesco left us with an idea: we should have a “board induction” for new board members. Making new members feel welcome, explain roles and responsibilities, etc

10. Alistair declared the meeting adjourned at 16:57 UTC.

Dated March 2, 2023

Secretary of the meeting: _____ Sebastian Strollo

1. Stipend request from Michael Lubas (1 page)

Stipend Proposal

Stipend Type : Development Work

First name : Michael

Last Name : Lubas

Email Address : michael@paraxial.io

Organization Name : [Paraxial.io](https://paraxial.io)

City : New York

Country : United States

Intended product of project :

The product of this project is "Potion Shop", an Elixir/Phoenix application that has several common web application vulnerabilities. The intention is to document these security flaws, and release the project and educational materials to the public. This project is inspired by OWASP Juice Shop, <https://github.com/juice-shop/juice-shop>, which also teaches web application security, but is not focused on Elixir.

Purpose

The purpose of this project is to create an educational resource to teach Elixir developers about web application security. As Elixir is increasingly adopted by companies for web application development, there is a need for Elixir programmers to be familiar with security flaws. Having a vulnerable application for a specific web framework is an effective way to teach these concepts, and common in other language ecosystems. See: Rails Goat (Ruby) - <https://github.com/OWASP/rails Goat> OWASP Juice Shop (JavaScript) - <https://github.com/juice-shop/juice-shop>

Development Plan

Development will be done by Michael Lubas and Jonathan Kilby. Both are members of the EEF Security Working Group, have a technical background in security, and are committed to this project. Development work has already started, with both Michael and Jonathan dedicating several hours a week to the project. The first milestone is to have a basic application and styling done by Feb 25th. We completed this on Feb 20th, ahead of schedule. The second milestone involves the code for XSS, CSRF, and atom exhaustion vulnerabilities, due March 15th. The third milestone involves additional vulnerabilities, and training material to help people detect these problems (ex, using Sobelow). This is due April 5th.

Dissemination : Michael runs the [Paraxial.io](https://paraxial.io) blog and mailing list, whose audience is interested in Elixir security. He will publish material about this project, and submit a conference talk about this project to the following conferences: EMPEX NYC - <https://www.empex.co/new-york> ElixirConf USA 2023

Delivery Method : The project will be entirely hosted on Github, including the educational materials about the vulnerabilities in the application.

Stipend Amount (USD) : 2000
