

EEF Meeting Minutes, Thursday April 27, 2023

Erlang Ecosystem Foundation, Minutes of a Regular Meeting of the Board of Directors Meeting #80, April 27, 2023

A regular meeting of the Erlang Ecosystem Foundation was held over group conference call (Zoom). The meeting began at 16:03 UTC.

Attendance

The following members of the board of directors were present (9/11): Francesco Cesarini, Maxim Fedorov, Frédéric Trottier-Hébert, Bryan Paxton, Ben Marx, Kenneth Lundin, Peer Stritzinger, Sebastian Strollo, and Alistair Woodman.

The following members of the board of directors were absent: Sophie DeBenedetto, Miriam Pena Villanueva.

Also present was the newly elected board member Amos King.

Agenda Items

1. Approval of minutes from previous meetings.

RESOLVED, that the Erlang Ecosystem Foundation approve the minutes as presented as representing a true and accurate record of the board meeting #79 held on April 13, 2023. Unanimously approved.

2. Intermediate actions and activities: none

3. Election update: the revote was completed, and results disseminated by blog post to the EEF site. Of eligible voters 41% participated. This time the election was completed without a hitch. Thank you Ben and Bryan for your service as election officers. The results were as follows: Francesco Cesarini (65 votes), Sebastian Strollo (49 votes), Alistair Woodman (49 votes), Amos King (44 votes), Kiko Fernandez-Reyes (36 votes), Thomas Depierre (28 votes). Thus the new cohort A consists of Francesco, Sebastian, Alistair, and Amos.

RESOLVED, that the Erlang Ecosystem Foundation ratifies the election results, and that the new cohort A consists of: Francesco Cesarini, Amos King, Sebastian Strollo, and Alistair Woodman. Unanimously approved.

The board would like to thank founding and outgoing board member Fred Hebert for his excellent service on the board and to the EEF community. The board would also like to welcome its newest member Amos King.

4. Fred presented his election post-mortem / incident report - and explained the rationale behind it. The board approved it for publication (Amos abstained, as he had not received it in time to read it before the board meeting).
5. Election of Chairperson, Secretary, and Treasurer was postponed to next meeting. Let Ben and / or Bryan know if you would like to be considered for any of these positions.
6. Feedback from ElixirConf EU: huge success in terms of attendance, Francesco and Alistair did some EEF advertisement and encouraged audience to join.
7. Stipend requests:
 1. Peer presented Tanguy Losseau's stipend request for \$3,000 to keep building on the BLAS project.

RESOLVED, that the Erlang Ecosystem Foundation approve the stipend request by Tanguy Losseau for \$3,000 to continue development of the BLAS library. Unanimously approved.

8. Alistair declared the meeting adjourned at 17:00 UTC.

Dated April 27, 2023

Secretary of the meeting: _____ Sebastian Strollo

1. Stipend request from Tanguy Losseau, 1 page

Stipend Proposal

Stipend Type : Development Work

First name : Tanguy

Last Name : Losseau

Country : Belgium

Intended product of project : This is a follow up project of the BLAS library for erlang (<https://github.com/erlef/blas>). The goal is to adapt the LAPACKE library, which offers more complex matrix-vector operations (matrix decomposition, inversion,...) and help others integrating this into GRISP as an example for embedded systems use.

Purpose: Any project making use of vector-matrix operations would obtain performance boost; in particular, work done on desktop/GRISP. This would have an immediate impact on projects such as improving the HERA framework (<https://www.info.ucl.ac.be/~pvr/icfpws21erlangmain-p2-p-19c84ebd5c-53047-submitted.pdf>), which is still an ongoing project at the Universite Catholique de Louvain la Neuve with Prof. Peter Van Roy. Also, expanding the numerical capabilities of Erlang and other Ecosystem languages opens up new use-cases and opportunities for user-grow.

Development Plan: The work on Lapacke would be done in July/August. Design/help on integration will start in late April. This project is done in ongoing collaboration with EEf Embedded WG but will also benefit Machine Learning WG.

Dissemination : A master thesis done at UCLouvain, "Low-cost high speed sensor fusion with Hera and Grisp", will provide a first study of BLAS usage on GRISP (estimated in June/August). Project completion will be announced on Erlang's forums.

Delivery Method : In a github repo.

Stipend Amount (USD) : 3000
