

EEF Meeting Minutes, Thursday August 3, 2023

Erlang Ecosystem Foundation, Minutes of a Regular Meeting of the Board of Directors Meeting #85, August 3, 2023

A regular meeting of the Erlang Ecosystem Foundation was held over group conference call (Zoom). The meeting began at 16:04 UTC.

Attendance

The following members of the board of directors were present (8/11): Francesco Cesarini, Sophie DeBenedetto, Maxim Fedorov, Amos King, Kenneth Lundin, Peer Stritzinger, Sebastian Strollo, and Alistair Woodman.

The following members of the board of directors were absent: Ben Marx, Bryan Paxton, Miriam Pena Villanueva.

Agenda Items

1. Approval of minutes from previous meetings.

RESOLVED, that the Erlang Ecosystem Foundation approve the minutes as presented as representing a true and accurate record of the board meeting #84 held on July 20, 2023. Unanimously approved.

2. Intermediate actions and activities: none
3. Treasury and Membership update: Sebastian presented the current p&l and balance sheet (now including our unpaid stipends on the balance sheet). Sebastian noted that he had made a mistake, paying \$578.31 from his own account into the EEF credit card (instead of to his own credit card) - as soon as he figures out how to properly book it he will transfer that amount back to his account. Membership update: Annual supporting: 147, Basic 1326, Lifetime supporting: 19, Managing and Contributing: 18. Total: 1518. There has been a recent increase, probably because SpawnFest decided to use EEF slack to organize, and they were nudged to join (thanks Bryan!). Site note: we should probably require a valid email to become member, and purge our membership list of members with invalid emails.
4. Cybergrants.com. Cisco has asked us to register at cybergrants.com (an organization that vets non-profits) before they will sponsor us. We need to provide

detailed information about our organization, and we need an approval from the board (or “executive management team”) to proceed.

RESOLVED, that the Erlang Ecosystem Foundation approve registering at cybergrants.com

5. Unanimous consent votes: none scheduled.

6. Stipends:

1. Travel stipend from Shuntian Liu to be able to present in person at CodeBEAM Europe 2023 in Berlin, at \$1250. After some discussion: Peer will sherpa. We approve up to \$500.

RESOLVED, that the Erlang Ecosystem Foundation approve up to \$500 to support Shuntian Liu so that he can present in person at CodeBEAM Europe 2023.

7. Any other topics:

1. Alistair reported that at IETF he ran into “SCITT” (a draft rfc around “An Architecture for Trustworthy and Transparent Digital Supply Chains”). Peer and Maxim noted that it has been brought up in the security working group (noting that both rebar and mix have plugins supporting sbom). Something the EEF should keep an eye on and perhaps support tooling development.

8. Alistair declared the meeting adjourned at 16:51 UTC.

Dated August 3, 2023

Secretary of the meeting: _____ Sebastian Strollo

1. Stipend proposal from Shuntian Liu (1 page)

Stipend Proposal

Stipend Type : conference

First name : Shuntian

Last Name : Liu

Nick Name : Vincent

Country : United Kingdom

Linkedin : <https://www.linkedin.com/in/shuntian-liu/>

Website : <https://www.cuso4.me>

Bio :

Shuntian (Vincent) is a Master's student studying Computer Science at the University of Cambridge. He did his undergraduate project building a distributed Datalog engine in Erlang. In his Master's project, he worked on extending the Mnesia database with ventual consistency as a collaboration between the University of Cambridge and Erlang Solutions. This project won the Cambridge Computer Laboratory highly commended project prize. He is also planning to submit this work to database conferences for publication.

Purpose

This stipend will be used to cover the cost of travel and accommodation for Code BEAM Europe 2023, taking place on October 19-20 in Berlin. I am a recent graduate speaking at the conference. My presentation is on "Hypermnesia: Auto Reconciliation in Mnesia", an extension to Erlang's embedded database library. The new system is designed to: 1. address the missing auto conflict resolution in Mnesia; 2. be used "out-of-the-box" with minimal code refactoring I believe this work can improve the experience of developers using Mnesia and Erlang. Advertising it can potentially help inspire more improvements in Mnesia/Erlang. Ideally, the funds should be received before Code BEAM for me to book flights and hotels. I am also applying to Erlang Solutions for funds. The breakdown for the amount I am requesting: \$750 for the venue \$300 for travel \$200 for food

Report : I am planning to write a blog post after giving the talk, including: 1. technical details of the talk; 2. general lessons learned from the talk; 3. feedback from the audience and what can be made better, in terms of presentation and technology. This post will be put on my personal website. I am also in the process of submitting a pull request to the main OTP repo, intending to merge this new feature of Mnesia to the main OTP branch so that it can reach more developers.

Stipend Amount (USD) : 1250

Beneficiaries : There are three main beneficiaries of this stipend: 1. Myself, who is one of the speakers at Code Beam. This is a chance for me to learn, grow and network as an Erlang developer; 2. Audience of the talk. This talk will present a new way to achieve automatic conflict resolution in Mnesia. I hope this can inspire further work and foster collaborations within the Erlang ecosystem; 3. Wider Erlang/Mnesia community. This talk will be published by Code BEAM after the event. I am also planning to write up my experience of giving the talk at Code BEAM afterwards and publish it on my personal website. Code BEAM size: 2 days, 30+ speakers, 300+ attendees
