

EEF Meeting Minutes, Thursday December 7, 2023

Erlang Ecosystem Foundation, Minutes of a Regular Meeting of the Board of Directors
Meeting #92, December 9, 2023

A regular meeting of the Erlang Ecosystem Foundation was held over group conference call (Zoom). The meeting began at 17:04 UTC.

Attendance

The following members of the board of directors were present (10/11): Francesco Cesarini (joined 33 minutes past the hour), Amos King, Ben Marx, Maxim Fedorov, Kenneth Lundin, Bryan Paxton, Miriam Pena Villanueva, Peer Stritzinger, Sebastian Strollo, and Alistair Woodman.

The following members of the board of directors were absent: Sophie DeBenedetto.

Also present was Kiko Fernandez-Reyes from the OTP team as an invited guest.

Agenda Items

1. Approval of minutes from previous meetings.

RESOLVED, that the Erlang Ecosystem Foundation approve the minutes as presented as representing a true and accurate record of the board meeting #91 held on November 9, 2023. Unanimously approved.

2. Intermediate actions and activities:

1. Alistair reported that our taxes (federal and state) were filed on time.
2. Sebastian and Peer has been invited to the program committee of the Code BEAM Lite Stockholm 2024 as representatives for the EEF.
3. Date for the Annual General Meeting, AGM. Proposal by Alistair: Thursday December 21, on our regular board time slot (i.e. 9 am Pacific time) as well as a slot for EMEA at 9am Central European Time / 5pm Tokyo time. Accepted by the meeting.
4. Treasury and Membership update: Peer presented the current membership numbers: Basic: 1414, Annual Supporting: 148, Lifetime: 21, Managing and Contributing: 18. Sebastian went through the current balance sheet (including

outstanding stipends) as well as the p&l for the year to date. We have not received as much in sponsorship donations as we would like. Two main issues: chasing sponsors (new and renewals), and just getting the “process” to work seamlessly. Francesco (who joined the meeting here) noted that there are not many inbound requests to sponsor the foundation, so we need to chase - everyone please help in any way you can (start with your own employer).

5. Unanimous consent votes: none scheduled.

6. Stipends:

1. Proposal from Tristan Sloughter to implement support for OpenTelemetry Metrics and Logs, along with Telemetry.Metrics integration. For \$15,000. Peer is sherpa, presented the proposal.

RESOLVED, that the Erlang Ecosystem Foundation approve the stipend request from Tristan Sloughter to implement support for OpenTelemetry Metrics and Logs (as described in the attached stipend request), for a total of \$15,000. Unanimously approved.

2. Travel stipend request from Benjamin Philip. Decision deferred, Miriam to sherpa, and bring back to the board.

7. Kiko gave a short update on what the OTP team is up to, thank you.

8. Bryan reported from SpawnFest: judging is complete, winners will be announced on Monday.

9. Any other business: none

10. Alistair declared the meeting adjourned at 18:03 UTC.

Dated December 7, 2023

Secretary of the meeting: _____ Sebastian Strollo

1. Stipend request from Tristan Sloughter re OpenTelemetry (2 pages)

Stipend Proposal

Stipend Type : Development Work

First name : Tristan

Last Name : Slougher

Country : United States

Intended product of project :

The result of this project would be a stable release of Erlang/Elixir support for OpenTelemetry Metrics and Logs, along with Telemetry.Metrics integration.

Purpose

OpenTelemetry is growing fast and seeing adoption across the industry -- both users and vendors. Erlang/Elixir has a stable tracing implementation and now metrics and logs specifications have been stabilized. Thanks to the Foundation's stipends we have an experimental implementation of both but they need work to both finalize (there have been updates to the spec since the original implementations such as the addition of Exemplars, <https://opentelemetry.io/docs/specs/otel/metrics/sdk/#exemplar>) and to integrate with existing tooling (https://github.com/beam-telemetry/telemetry_metrics). A major part of this would be support for integration of Telemetry.Metrics (https://github.com/beam-telemetry/telemetry_metrics) which has become the defacto standard in Elixir for defining metrics. Support for Telemetry.Metrics means no code changes necessary for Elixir projects already using telemetry. OpenTelemetry Logs (<https://opentelemetry.io/docs/specs/otel/logs/>) are not a new API for the user but meant for correlation with other telemetry signals and providing a format and protocol for export.

Development Plan

I (Tristan) will perform the development work over the course of 2 months. Fellow OpenTelemetry maintainers will be doing reviews of the code. First is bringing metrics up to match the current spec and add new tests based on existing stable implementations in other languages to verify compliance. Next, documentation for metrics will be written for <https://opentelemetry.io/docs/instrumentation/erlang/>. Then, the logging bridge will be completed so OTP logger logs can be easily configured to output logs in the OpenTelemetry standard with appropriate context from instrumentation. Finally, support for Telemetry.Metrics to be integrated with OpenTelemetry Metrics will be written as a new library in <https://github.com/open-telemetry/opentelemetry-erlang-contrib/>. Because metrics and logging have experimental implementations it is expected that the integration with Metrics.Telemetry will be the longest phase. Any additional time will be spent on support for OpenTelemetry Events

Dissemination : Social media posts will announce release, blog post on <https://blog.erlware.org/> and potentially <https://opentelemetry.io/blog/2023/>

Delivery Method : Delivery will be releases of on hex of stable API and SDK opentelemetry packages with metrics and logging included.

Stipend Amount (USD) : 15000
