

EEF Meeting Minutes, Thursday October 24, 2024

Erlang Ecosystem Foundation, Minutes of a Regular Meeting of the Board of Directors
Meeting #108, October 24, 2024

A regular meeting of the Erlang Ecosystem Foundation was held over group conference call (Zoom). The meeting began at 16:04 UTC.

Attendance

The following members of the board of directors were present (11/11): Francesco Cesarini, Maxim Fedorov, Kiko Fernandez-Reyes, Kenneth Lundin, Amos King, Ben Marx, Bryan Paxton, Miriam Pena Villanueva, Peer Stritzinger, Sebastian Strollo, and Alistair Woodman.

The following members of the board of directors were absent: -none-

Also present was Paula Calgaro from the marketing team, and as an invited guest: Jonatan Männchen.

Agenda Items

1. Approval of minutes from previous meeting(s):

RESOLVED, that the Erlang Ecosystem Foundation approve the minutes as presented as representing a true and accurate record of the board meeting #106 held on September 26, 2024. Unanimously approved.

RESOLVED, that the Erlang Ecosystem Foundation approve the minutes as presented as representing a true and accurate record of the board meeting #107 held on October 10, 2024. Unanimously approved (with Maxim abstaining, as he was not present for that meeting)

2. Intermediate actions:

1. Lee Barney demoed his work with ChatGPT resulting in a "Structural Beam GPT, an assistant to help you architect and design Beam-based systems using rebar3" to the education working group. Wider dissemination is planned.
2. Noted that the io_uring topic on Erlang Forums re-awoke

3. Alistair is in an ongoing conversation with the company that is interested in funding work on the CRA.
4. Alistair has signed up for Eclipse Foundation's ORC (Open Regulatory Compliance) WG
3. Unanimous consent votes: none scheduled.
4. Membership update: Basic 1656, Annual supporting 128, Lifetime supporting 24, Managing and contributing 14.
5. Financial report: Since last meeting Pau has helped organizing all the outstanding stipends request, and begun chasing people for a status update (to determine if any of the projects can be considered abandoned). Sebastian has sent out four new invoices (one new sponsor, and three renewing). This work led to a net improvement on the balance sheet from \$47,690 to \$70,190. More work is needed to go through all the outstanding stipends.
6. Stipend requests
 1. "Erlang/Elixir continuous profiling through the OpenTelemetry eBPF profiler" from Greg Mefford, for \$10,000. Bryan to sherpa, and presented the case for the work. Bryan will work with Greg to come up with a timeline and clear deliverables.

RESOLVED, that the Erlang Ecosystem Foundation approve the stipend request from Greg Mefford for the OpenTelemetry eBPF profiler project, at a budget of at most \$10,000. Unanimously approved.
 2. A discussion around process: we should start requiring timelines for stipend request (for larger projects have milestones with intermediate deliverables, and possibly tie payments to deliverables). The exact process needs to be worked on: Bryan, Amos, Peer, Alistair, and Sebastian to work on a proposal.

7. Proposal that EEF applies to become a CNA (a "CVE Numbering Authority", see <https://nvd.nist.gov/general/cna-counting> for details) for Elixir, Gleam, and packages in Hex (Erlang/OTP is, and would continue to be handled by Ericsson). Jonatan Männchen explained the proposal, which was brought up in the security working group, and the idea was approved there on October 16.

RESOLVED, that the Erlang Ecosystem Foundation approve the plan to apply to become an SNA with NIST for Elixir, Gleam, and Hex packages.

8. Fundraising: please join the sponsorship working group, even if you can't attend the meetings join the slack channel, encourage others to join (you don't have to be on the board to be part of the sponsorship working group). And reach out to new companies!

9. Any other business: none

10. Alistair declared the meeting adjourned at 17:00 UTC.

Dated October 24, 2024

Secretary of the meeting: _____ Sebastian Strollo

Stipend Proposal

Stipend Type : Development Work

Name : Greg Mefford

City : Loveland, OH

Country : United States

Intended product of project :

The result of this project will be support for Erlang/Elixir continuous profiling through the OpenTelemetry eBPF profiler (<https://github.com/open-telemetry/opentelemetry-ebpf-profiler>). This profiler was originally developed by Elastic and donated to OpenTelemetry in June. Two Elastic employees who work on the project have volunteered to help with the development of support for Erlang/Elixir.

Purpose

Continuous profiling is a new telemetry signal type in OpenTelemetry that has growing support from APM vendors with visualization and search tools like <https://px.dev/>, <https://grafana.com/oss/pyroscope/>, <https://www.polarsignals.com/>, <https://www.elastic.co/observability/universal-profiling> and <https://www.datadoghq.com/dg/apm/profiler/continuous-profiler/> to name a few. The OpenTelemetry Profiler has support for C/C++, Rust, Zig, Go, JVM, Python, Ruby, PHP, Node.JS, V8, and Perl. The purpose of this project is to add support for Erlang/Elixir, thus making us able to have continuous profiling that is analyzed through many existing tools, the same as the languages/runtimes that are already supported.

Development Plan

Development will start through a sync with the Elastic employees who work on the profiler and have already thought about how BEAM support would be done.

Development will be on a fork of <https://github.com/open-telemetry/opentelemetry-ebpf-profiler> to be upstreamed when complete. The progress of development and communication during development will be through CNCF Slack and bi-weekly meetings of the OpenTelemetry Erlang/Elixir SIG.

Dissemination : Following completion the support for BEAM profiling can likely be published on the OpenTelemetry blog, <https://opentelemetry.io/blog/>. Along with tweets from @opentelemetry and @erlef tweeting this announcement blog post.

Delivery Method : Delivery will come through a merged PR to <https://github.com/open-telemetry/opentelemetry-ebpf-profiler>, followed by a release of the OpenTelemetry profiler.

Stipend Amount (USD) : 10000
